

REPORT ON AICTE  
ACTIVITY-1, conducted by  
ISE DEPARTMENT, ATRIA  
INSTITUTE OF TECHNOLOGY  
on 28th & 29th of FEB 2020

# REPORT ON ACTIVITY-1 CONDUCTED BY ISE DEPARTMENT.

ATRIA  
INSTITUTE OF  
TECHNOLOGY.

## INTRODUCTION

As per the activity prescribed by AICTE, our students visited two schools namely Government Higher Primary School, Kantanakunte village and Government Higher Primary School, Palanajogihalli village near Doddaballapura Taluk and conducted various surveys and activities scheduled by our college. Plenty of activities such as training introducing the pupils to basics of Computer Science , showing them the importance of higher education through skits and other various activities. Stressing on the importance of Cleanliness was another important factor included in the activities planned by our students. Students

also conducted village survey where they wanted to find out the literacy level of the population in that area and the difficulties, they face in educating their wards. The activities were well planned by our own students and was extremely well received and supported by our Principal and the Institution. how to adapt to village life, joy of sharing things and how to work in groups. Students also conducted village survey where they wanted to find out the literacy level of the population in that area and the difficulties, they face in educating their wards.

The school students enjoyed the activities and gained the valuable information that was being taught. Making sure that the little ones learn and understand what we teach through various activities that help them shape a better future for themselves and for our country, was the ultimate goal of the students of our college.

## ACTIVITIES CONDUCTED:

### DAY-1

- Interaction with students about their interest in higher education.
- Skit on higher education.
- Mathematics quiz.
- Minute to win game.
- Skit on awareness of cleanliness.  
Report / Review from students about the skit.
- Campus clean
- Fun with students.
- Survey on literacy level.

### DAY-2

- Motivational videos.
- Women safety precautions and awareness about the society.
- Power point presentation / chalk and talk on basics of computers.
- Explaining Basic operations on laptop and asking students to do the same.
- Prize distribution and vote of thanks.

## ❖ Skit on higher education.

After a brief introduction about our college and our aim for conducting the camp, our students started an interactive session. Most kids were asked what they'd like to become when they're all grown up to which they all had very interesting answers. Many of them wanted to be in public services like Police service, Indian Army etc, to serve our nation. That motivated our students to further conduct the session.

A lot of ideas in that regard were given by our students such as the courses they had to take up in order to grow closer to fulfilling their dreams. Our students put up a skit based on THE IMPORTANCE OF HIGHER EDUCATION and tried their best to make the kids understand and learn in creative ways. The kids thoroughly enjoyed and were very supportive and put up their best behavior throughout the duration of our camp. They answered all the questions that were asked, and our students made sure that they were comfortable interacting with us. They also included some recreational activities such as music and dance for a brief period. Ultimately, we were satisfied having conveyed our message to the kids.

### ❖ Mathematic quiz.

We gave the students some mathematics questions and asked them to solve it on board and some questions we asked them to solve it in their notebooks. Few students solved the questions while some of them were unable to, our team members individually interacted with the students and made sure they solved every problem correctly. This was a fun session overall.

### ❖ Minute to win.

Our students aimed to refresh the mind of all the children after a tiring math session, so they introduced the classic CUP GAME. The children were divided in groups and the time duration was noted and a list of winners were made who were given little gifts of our students' choice.

### ❖ Skit on cleanliness and campus clean

Then afternoon after lunch we had session on cleanliness. As earlier we started our interaction with the quote

Cleanliness is next to godliness.

We played a skit on cleanliness and took the review from the students as usual not to bore the students ,we added some hilarious situations in the skit.

Our students along with the kids gloved up and went on to clean the school surroundings given that a clean campus is a healthy campus. Our students intended to make the kids fully understand the importance of cleanliness and the executed it very well as expected and therefore helped inspire students and everyone around to keep their surroundings clean.

### ❖ Fun with students

To entertain the students and to remove stage fear in kids, we asked some of the kids to expel their talent like singing , dancing , etc. most kids participated whole heartedly and our students joined them to make them feel comfortable and enjoyed with them.

### ❖ Survey on literacy.

After a rather tiring day instead of sleeping it off our students decided to conduct the village survey on literacy as the night was still young. The students divided themselves into groups and conducted the survey in the specific area. The public showed immense support to our college students by dedicating a few minutes of their precious time and answering all the questions being asked. Hence, the survey was a success indeed.

## ❖ Motivational videos

The kids were shown motivational videos to help inspire them to study and work hard. Our students also taught them the importance of leisure and the demarcation between working hard and having their share of fun. The goal was to help the kids develop into better versions of themselves.

## ❖ Women safety awareness

This was a very important session where our students taught the pupils all about safety of women and enlightened them about different kinds of apps available for the sole purpose of safety of our women. The students were made to understand how to be safe and were taught certain self-defense protocols.

## ❖ Chalk and talk / laptop work

Our students held a session on basics of computers and demonstrated the various operations and uses of laptops and gave the students small activities that they could do on the laptops which obviously got them elated as most of them had never used a laptop before.

## ❖ Price distribution and vote of thanks.

Last day we distributed some chocolates and thanked them for spending their valuable time with us. Our HOD and staff attended the session on behalf of the school principal and management staff we distributed prize for the winners and thanked everyone.

### THINGS WE ENGINEERING STUDENTS OBSERVED IN THAT VILLAGE DURING THIS ACTIVITY.

- The students are very interested and active enough to participate.
- They need some support and want to improve their skills.
- Their mindset and the way of speaking must be improved.
- Basics of computer education must be included in their syllabus to make them familiar with computers.
- They must get minimum knowledge about the society and overall development.
