**“REGARD BEFORE YOU DISCARD” – Best Out Of Waste.....**

With the growing increase in wastes in our society from household to industrial wastes, we now require a very innovative approach to get rid of them. Recycling and reusing the valuable waste material can result in development of fantastic and usable products. Rather than putting this waste material into the land fields, various innovative and creative ideas can be put together to being something new and useful. Everyday waste such as plastic, glasses, newspapers or electronic are not only waste of limited resources but also are harmful to the environment. This event is to bring such ideas to students and to help them think themselves on such ways of reusing everyday materials that will not only reduce the waste but provide them with useful household products. The ideas will not only be of economic and material value for students, but will be helpful in creating environmental consciousness among them that is the need of the hour.

Date: 16-02-23

Venue: MBA Department

**Rules and Regulation:**

- Team will consist of minimum 2 members maximum 3 members. (the right to change the number of team members will be in the hands of organizer and faculty coordinator).
