Department of Telecommunication  
MSRIT Bangalore

To whomsoever it may concern

I have interacted with the faculty of Electronics and Communication Engineering Department, Atria Institute of Technology, Bengaluru during the Department Academic Committee held on 28<sup>th</sup> June 2020. I found that the department teaching learning methodology is in line to the requirement of the time. The efforts made by the faculty during the pandemic time is appreciable. The use of ICT and the various student development activities will help all the students to have good understanding of the course. The add on programs and the cluster activities introduced in the department will definitely enhance the employability among students. The professional societies activities will add the leadership quality among the members and enhance their knowledge in various domain.

The innovation in teaching is the need of hour and the various activities such as project-based learning, soft skill training, mini projects and participation in various competitive events need to be encouraged more.

I wish all the best to the department for the continuous improvement in the teaching learning pedagogy.

Thanking You
